EPS'NİN TANIMI

Expanded Polistiren Sert Köpük (EPS-Genleştirilmiş Polistiren Sert Köpük), petrolden elde edilen, köpük halindeki, termoplastik, kapalı gözenekli, tipik olarak beyaz renkli bir ısı yalıtım malzemesidir. Polistiren taneciklerinin şişirilmesi ve birbirine kaynaşması ile elde edilen EPS (Genleştirilmiş Polistiren Sert Köpük) ürünlerde, taneciklerin şişirilmesi ve köpük elde edilmesi için kullanılan şişirici gaz 'Pentan'dır.

KULLANIM YERLERİ

Yapılan yan duvar, teras çatı, zemin ve bodrumların sığa-soğuga karşı yalıtımlarında, hafif prefabrik yapı elemanlarında, soğutma tesislerinde ticari depolarda, dilatasyon ve yağmur derelerinde, cam ve kırılabilir ürün taşımacılığında ambalajlamada balıkçılık sektöründe kalıp olarak kullanımı reklamcılık ve dekorasyon sektöründe ekspande polistiren köpük yaygın olarak kullanılmaktadır.

(EPS) ISI YALITIM LEVHALARININ FAYDALARI

- Mükemmel ısı yalıtımı sağlar.
- Lambda (Isı geçirgenlik katsayısı) değeri TS standartlarına (TS 825 Mecburi Standart) uygundur.
- Korozif değildir.
- Kimyasallara karşı dirençlidir.
- Çok iyi darbe absorpsiyon özelliği vardır.
- Çok küçük su absorpsiyon özelliği vardır.
- Uygulamaya çok elverişlidir.
- Sonsuz ömürlüdür.
- Çevrecidir.
- Dünya ve ülkemizde kullanımı yaygındır.
- İçinde ve üretiminde ozon tabakasına zarar verici CFC içermez.
- Geri dönüşümlüdür.
- Optimum nefes alma kabiliyeti ile yapıların içten yalıtımı ve dış cephe termal yalıtım sistemi (mantolama) uygulamalarında dünyanın tercihidir.
- Ekonomiktir.

DESCRIPTION OF EPS

Expanded Polystyrene Hard Foam is a kind of insulation material obtained from petrol that is in the form of foam, thermoplastic taht has closed pore and typically white colour. In the EPS (Expanded Polystyrene Hard Foam) product which is obtained with blowing up polystyrene particles and then combination of these them, the gas used to blow up particles and obtain foam is "pentane".

PLACES OF USE

Expanded polistiren foam is commonly used for the insulation of constructions' side walls, terrace penthouses, ground floor and cellars against heat-cold, in the light prefabricated constructional elements, cooling facilities, commercial warehouses, dilatation and rain streams, transportation of glass and breakable product, packing, in the fishing sector as mould and advertising and decoration sector.

(EPS) USES OF HEAT INSULATION PLATES

- Provides perfect heat insulation
 - Lambda value (heat permeability coefficient) is in compliance with DIN 4102 standards
 - It's not corrosive
 - Resistant against chemicals
 - Resistant against bacteria development
 - It has a very good shock absorption feature
 - It has a very small water absorption value
 - Very convenient for application
 - It has infinite life
 - Environmentalist
 - Its use is common in our country and in the world
 - It does not contain CFC that's harmful for ozone layer in it and in its production
 - Recycling
- It is the preference of the world with optimum breathing ability for internal insulation and external face thermal insulation applications (coating) of constructions.
- Economical

• Eps Enjeksiyon Tavan Kaplamaları/

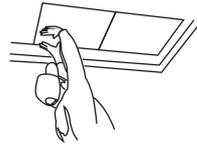

Tavan Kaplama Nasıl Uygulanır? *How to do Ceiling Tiles Application?*

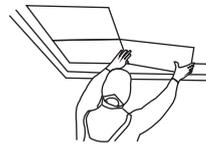

1 İç Cephe yapıştırıcısı malzeme üzerine küçük top taneler olarak uygulanır.
Interior Adhesive is applied on the material as small balls.

2 Yapıştırıcı dışarı taşınmadan, kapı girişinin karşısında ki köşeden (ek parçaların göze batmaması için) başlanır. Yapıştırma sırasında malzemeye fazla baskı yapılmadan "sağa ve sola oynatılarak" zemine yapıştırılmalıdır.
The adhesive is not effused and application begins from the corner at the opposite of entrance for preventing the parts do not offend the eyes. The material should not be applied overpressure during bonding, and it should be ensured that the adhesive is scattered on the surface by moving the plate right and left.

3 İki malzeme arasında dolgu yapılmamalı, dışarı taşan yapıştırıcılar derz olarak kullanılmamalıdır.
No filling should be applied between two materials and effused adhesive should not be used as suture.

4 Uygulamaya tek bir köşeden başlayıp, sistematik bir şekilde devam ettirilmelidir.
The application should begin from a corner and continued systematically.
